

ANKUSH KUNDAPURA ANNAIAH

AI/ML Developer | GenAI Engineer | Python Developer

Bengaluru, India | ankushkundapuraannaiah@gmail.com | [linkedin.com/in/ankushkundapura-annaiah-1797ba384](https://www.linkedin.com/in/ankushkundapura-annaiah-1797ba384)

OBJECTIVE

AI & ML engineering student and active GenAI Developer Intern with practical experience in LLM development, NLP pipelines, deep learning, model evaluation, dataset preparation, and AI automation. Proficient in Python, NumPy, Pandas, TensorFlow, and PyTorch. Seeking an AI/ML internship to assist in training and fine-tuning machine learning models, building AI-powered prototypes, generating evaluation datasets and Q&A sets, and contributing to research tasks. Available to commit 20+ hours per week.

EXPERIENCE

GenAI Developer Intern

Feb 2026 – Present

HiDevs | Bengaluru, India

- Worked with LLMs, NLP models, and deep learning frameworks to build and evaluate AI-powered features for internal projects.
- Assisted in fine-tuning and evaluating large language models; generated test cases, Q&A sets, and evaluation datasets for model benchmarking.
- Supported dataset preparation, cleaning, annotation, and labeling pipelines to improve training data quality.
- Built small AI tools, automation scripts, and prototypes using Python, LangChain, and transformer-based models.
- Participated in research tasks — read and summarized findings from recent AI/NLP/DL papers to guide team decisions.
- Documented experiments, model observations, prompt changes, and improvement notes; attended regular team sync-ups.
- Contributed to RAG (Retrieval-Augmented Generation) pipelines and vector database integrations for LLM grounding.

Python Developer Intern

Jan 2026 – Feb 2026

Pinnacle Labs | Bengaluru, India

- Developed Python automation scripts and data preprocessing pipelines using NumPy and Pandas for structured datasets.
- Applied data cleaning, transformation, and model evaluation logic to support ML-ready data workflows.
- Built REST API integrations and contributed to backend modules, demonstrating strong Python development fundamentals.

TECHNICAL SKILLS

Machine Learning & Deep Learning: Supervised Learning, Unsupervised Learning, Neural Networks, CNNs, RNNs, Transformers, Model Training, Fine-Tuning, Model Evaluation

NLP & LLMs: Natural Language Processing, Large Language Models, Generative AI, Prompt Engineering, RAG, LangChain, Text Classification, Tokenization

Python & AI Libraries: Python, NumPy, Pandas, TensorFlow, PyTorch, Scikit-learn, Hugging Face Transformers

Data & Evaluation: Dataset Preparation, Data Cleaning, Data Annotation & Labeling, Data Preprocessing, Evaluation Dataset Generation, Q&A Set Creation, Test Case Generation

Tools & Platforms: Git, Jupyter Notebooks, REST APIs, Vector Databases, Linux, VS Code

EDUCATION

B.Tech – Computer Science Engineering (Artificial Intelligence & Machine Learning)

Sep 2025 – Sep 2029

REVA University, Bengaluru, India

CERTIFICATIONS

- Team Essentials for Designing AI Solutions – AI model design and deployment concepts
- Data Streaming Engineer Foundations – real-time data pipelines and streaming architectures
- Introduction to Cybersecurity – foundational security awareness for AI systems
- OpenHack 2026 – Hackathon Participant (AI/ML track)

CORE COMPETENCIES

- AI research skills: able to independently read, analyze, and summarize findings from ML/DL/NLP academic papers
- Fast learner: quickly picks up new AI tools, frameworks, and techniques with minimal guidance
- Documentation discipline: clearly records experiments, observations, hypotheses, and model improvement notes
- Team collaboration: experienced in daily standups, mentor-guided workflows, and cross-functional team syncs
- Available 20+ hours per week with strong commitment to deliverables and deadlines
