

ANKUSH KUNDAPURA ANNAIAH

UI/UX Designer · Figma · Interaction Design · GenAI Product Interfaces

ankushkundapuraannaiah@gmail.com | Bengaluru, India | [linkedin.com/in/ankushkundapura-annaiah-1797ba384](https://www.linkedin.com/in/ankushkundapura-annaiah-1797ba384) | github.com/ankushkundapuraannaiah-bit

PROFESSIONAL SUMMARY

Passionate B.Tech CSE (AI & ML) student and active GenAI Developer Intern with hands-on experience in Figma, UI prototyping, Webflow/Framer, and HTML/CSS. Combines a strong foundation in AI/ML with an eye for human-centered design to craft intuitive digital products. Experienced in building AI-powered interfaces, conducting UX research, and iterating rapidly on feedback. Seeking a UI/UX Design Internship to contribute pixel-perfect, user-tested, and technically viable designs for real-world products.

EXPERIENCE

UI/UX & GenAI Product Design Intern | [HiDevs](#) · Bengaluru, India Feb 2026 – Present

- Designed user flows, wireframes, and high-fidelity UI screens in Figma for AI-powered internal tools and LLM-based features, improving usability for end users.
- Conducted UX research and competitor analysis on AI product interfaces to inform design decisions and improve conversion and engagement rates.
- Built interactive prototypes and design systems with reusable components in Figma, enabling faster developer handoff and consistent visual language.
- Collaborated closely with developers to ensure pixel-perfect implementation of UI designs; used HTML/CSS knowledge to bridge design-dev gaps.
- Designed interfaces for RAG pipelines and vector database tools — applying principles of AI product UX to complex, data-heavy workflows.
- Iterated rapidly on designs based on team feedback; maintained component libraries and documented design decisions for cross-functional alignment.

Python Developer Intern | [Pinnacle Labs](#) · Bengaluru, India Jan 2026 – Feb 2026

- Developed data preprocessing and automation scripts; applied data visualization thinking to surface insights in structured datasets.
- Built REST API integrations and contributed to backend modules, gaining technical fluency that informs developer-aware, implementation-ready UI designs.

PROJECTS

AI Product Interface Design | [Figma](#) · [Framer](#) · [UX Research](#) 2026

- Designed end-to-end user flows and high-fidelity mockups for an AI assistant dashboard — covering onboarding, chat interface, and output display screens.
- Applied UX heuristics (Nielsen's 10), conducted competitive analysis of tools like ChatGPT, Notion AI, and Perplexity to inform design decisions.
- Created a responsive, mobile-first design system with 30+ reusable Figma components; reduced design-to-dev handoff time significantly.

SaaS Dashboard UI – Data Analytics Tool | [Figma](#) · [Webflow](#) · [HTML/CSS](#) 2025–2026

- Designed a multi-page SaaS analytics dashboard with data tables, filter panels, and chart widgets — optimized for usability and conversion.
- Prototyped interactive micro-interactions and hover states in Figma; exported to Webflow for live preview and stakeholder validation.
- Implemented responsive grid layouts using HTML/CSS to ensure consistent rendering across desktop, tablet, and mobile breakpoints.

OpenHack 2026 – AI/ML Hackathon | [Python](#) · [Figma](#) · [Rapid Prototyping](#) 2026

- ▶ Participated in OpenHack 2026 (AI/ML track); contributed UI design and rapid prototyping alongside a cross-functional team under time pressure.
- ▶ Delivered wireframes and clickable prototypes within a tight hackathon timeline, demonstrating ability to take feedback and iterate quickly.

SKILLS

Design Tools: Figma (Advanced) · Framer · Webflow · Adobe XD · Figma Dev Mode

UX Practice: User Flows · Wireframing · High-Fidelity Prototyping · UX Research · Competitor Analysis · Usability Testing · Design Systems · Component Libraries

Front-End: HTML5 · CSS3 · Responsive Design · Mobile-First Design

AI & Product Design: AI Product Interfaces · LLM UX · SaaS Dashboard Design · Conversational UI · RAG Interface Design

Soft Skills: Cross-functional Collaboration · Fast Iteration · Design Feedback Incorporation · Documentation · Agile / Daily Standups

Programming: Python · NumPy · Pandas · LangChain · Git

EDUCATION

B.Tech – Computer Science Engineering (AI & ML) | REVA University, Bengaluru Sep 2025 – Sep 2029

- ▶ Relevant coursework: Human-Computer Interaction, Data Structures, AI/ML Foundations, Software Engineering.
- ▶ Active member of the tech and innovation community; participated in OpenHack 2026 and multiple AI/ML projects.

CERTIFICATIONS & ACHIEVEMENTS

- ▶ Team Essentials for Designing AI Solutions – AI model design, UX considerations for AI products
- ▶ Data Streaming Engineer Foundations – real-time data pipelines (informs SaaS dashboard design thinking)
- ▶ Introduction to Cybersecurity – security-aware design principles
- ▶ OpenHack 2026 – Hackathon Participant, AI/ML Track (Certificate of Participation)

Portfolio & projects available on request · Open to immediate start · 20+ hrs/week availability
